Profile

A dedicated problem-solver and experienced Front End Developer proficient in both frontend and backend technologies. Passionate about delivering exceptional user experiences and innovative solutions that align with business objectives. Leveraging technical expertise and a degree in marketing to excel in web development.

Experience

Frontend Developer
RVnGO (Nov. 2021-present)

- Spearheaded the design of working prototypes using Figma, ensuring a user-centered approach to UI/UX development.
- Implemented frontend UI/UX features and improvements in two week sprints.
- Developed high-quality React components for the frontend, elevating the user experience and delivering impactful UI enhancements.
- Assisted on full-stack projects in the backend.
- Worked in an agile environment with remote developers.
- Participated in and led daily stand-ups.
- Assigned team tasks, milestones and kept the project board organized.

Frontend Developer
Don't Forget App (2021)

- Created a custom responsive todo list using JavaScript, with features like function expressions, filtering, local storage, and state management.
- Currently refactoring version 2 of the application and planning to migrate it to React.
- Responsible for completing tasks every interaction, which is divided into 2-week increments.
- Will migrate code to *React* in future.
- Desired a modern aesthetic channel to edit my lego-like life.
